PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Software Developer with a passion for building scalable, user-friendly applications. Currently pursuing a B.Tech in Computer Science at Siliguri Institute of Technology (2022-2026). Proficient in modern web technologies including React.js, Node.js, Spring Boot, and modern ORMs. Adept at leveraging artificial intelligence and distributed microservices architectures to solve complex problems and create dynamic web experiences. Keenly interested in the intersection of scalable technology and innovative software solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot, Flask, Tailwind CSS

Databases & Caching: PostgreSQL, MongoDB, Redis, Prisma, Drizzle

Architecture & DevOps: Microservices, Docker, Kubernetes, CI/CD

Tools & APIs: Elasticsearch, Kafka, Grafana, Google Gemini API, YouTube Data API, Tesseract OCR

KEY PROJECTS

StudyAI — PDF to Smart Study Pack

Web Developer

- Designed an intelligent web application that extracts text from scanned or digital PDFs to automatically generate structured study materials.
- Integrated Tesseract OCR for text extraction and Google Gemini AI to synthesize key concepts, generate interactive flashcards, and create automated quizzes.
- Utilized the YouTube Data API to recommend contextual educational videos based on extracted topics.
- Tech Stack:** React, Vite, Flask, PyMuPDF, Tesseract OCR, Gemini API, YouTube API.

VibeMusic — Real-Time Mood & Activity Playlist Generator

Full-Stack Developer

- Developed an innovative web application that curates real-time, highly personalized YouTube playlists by analyzing a user's immediate environment and state of mind.
- Leveraged Google Gemini API to analyze user selfies for instant mood detection.
- Integrated real-time weather tracking, physical activity monitoring (walking, driving, resting), and language preferences to dynamically adapt the soundtrack.
- Tech Stack:** React, Google Gemini API, YouTube Data API.

RentEasy — Student Accommodation Finder

Full-Stack Developer

- Spearheaded the end-to-end development of a scalable student accommodation platform using a distributed microservices architecture to connect students with verified PGs and hostels.
- Implemented high-performance search functionality using Elasticsearch and integrated Redis caching to manage real-time room availability, successfully preventing double bookings.
- Built robust backend services with Node.js/Spring Boot and PostgreSQL, integrating **AWS S3** for secure media storage and **Razorpay** for seamless payment processing.
- Containerized and deployed the web and **Flutter** mobile applications using Docker and Kubernetes, utilizing Kafka for asynchronous messaging and **Prometheus**/Grafana for real-time system health monitoring.

Age Well Mart

Front-End Developer

- Engineered the front-end user interface for an e-commerce platform tailored for senior citizens, focusing on accessibility and an intuitive browsing experience for essential elder-care products.
- Tech Stack:** React.js, Tailwind CSS (Interfaced with a Node.js/MongoDB backend).

LQ Delivery

Web Developer

- Developed a low-cost delivery website featuring real-time location tracking to facilitate the home delivery of beverages.

EDUCATION

Siliguri Institute of Technology

B.Tech in Computer Science

- Current CGPA:** 7.1

Sukna, Darjeeling, West Bengal

2022 – 2026

ACHIEVEMENTS & EXTRA-CURRICULARS

- Secured 3rd position in a competitive college-level hackathon.
- Deep interest in geopolitics and international affairs.
- Passionate about sketching, playing football, and cricket.
